HANNENG CAILIAO

第 7 卷 第 3 期 1999 年 9 月

## 目 次

|                                                                                                                        |                |                |                                               |
|------------------------------------------------------------------------------------------------------------------------|----------------|----------------|-----------------------------------------------|
| 高速撞击流制备超细硝胺炸药的实验研究 .....                                                                                               | 张小宁            | 徐更光            | 王廷增 ( 97 )                                    |
| 六硝基六氮杂异伍兹烷的感度 .....                                                                                                    | 欧育湘            | 王 才            | 潘则林 陈博仁 (100)                                 |
| 有机叠氮化物几何构型和生成热的分子轨道研究 .....                                                                                            | 陈兆旭            | 宋伟红            | 肖鹤鸣 (103)                                     |
| 六硝基六氮杂异伍兹烷分子构型的理论研究 .....                                                                                              | 文 忠            | 田双河            | 赵鹏骥 徐志磊 田安民 (110)                             |
| 高能硝胺推进剂的暗区压强敏感性分析 .....                                                                                                | 庞爱民            | 王北海            | 田德余 (115)                                     |
| 低压下贫氧推进剂燃烧性能测试方法研究 .....                                                                                               | 张 炜            | 朱 慧            | 方丁酉 夏智勋 薛金根 (118)                             |
| Salts of Perchlorylamide as a Novel Class of Light-sensitive Explosive for Laser Initiation .....                      |                |                |                                               |
| .....                                                                                                                  | Ilyushin M A   | Tselinskii I V | Petrova N A, Chernai A V, Zemlyakov N D (122) |
| 液体燃料中铝粉活性的实验研究 .....                                                                                                   | 刘吉平            | 常 非            | 贵大勇 (124)                                     |
| Electric Spark Sensitivity of Polynitro Compounds; Part II. A Correlation with Detonation Velocities of some Polynitro |                |                |                                               |
| Arenes .....                                                                                                           |                |                |                                               |
| .....                                                                                                                  | VladimÓr ZEMAN | JirÓ KOČÍ      | Svatopluk ZEMAN (127)                         |
| 含铝炸药起爆机理的研究 .....                                                                                                      | 夏先贵            | 柏劲松            | 林其文 章冠人 (133)                                 |
| GAP/AN 推进剂燃速特性研究 .....                                                                                                 | 赵孝彬            | 侯林法            | 张小平 于 敏 (137)                                 |
| 弹性体交联密度测定仪的改进及其应用 .....                                                                                                | 芦 明            | 宋永莱            | 袁其凤 刘 洪 黄志萍 (141)                             |

# ENERGETIC MATERIALS

Vol. 7, No. 3, 1999

## CONTENTS

|                                                                                                                                     |                                                                               |
|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| A Study on Preparation of Ultra-fine Nitroamine Explosives by Using High-speed Impinging Stream.....                                |                                                                               |
| .....                                                                                                                               | ZHANG Xiao-ning, XU Geng-guang, WANG Ting-zeng ( 97 )                         |
| Sensitivity of Hexanitrohexaazaisowurtzitane .....                                                                                  | OU Yü-xiang, WANG Cai, PAN Ze-lin, CHEN Bo-ren ( 100 )                        |
| Investigation on Geometry and Heat of Formation of Organic Azides by MO Methods .....                                               |                                                                               |
| .....                                                                                                                               | CHEN Zhao-xu, SONG Wei-hong, XIAO He-ming ( 103 )                             |
| A Theoretical Study on the Molecular Structure of Hexanitrohexaazaisowurtzitane .....                                               |                                                                               |
| .....                                                                                                                               | WEN Zhong, TIAN Shuang-he, ZHAO Peng-ji, XU Zhi-lei, TIAN An-min ( 110 )      |
| Pressure Dependence of the Dark Zone in Combustion Wave of High Energy Nitroamine Propellants .....                                 |                                                                               |
| .....                                                                                                                               | PANG Ai-min, WANG Bei-hai, TIAN De-yu ( 115 )                                 |
| A Study on Measurement of Fuel-rich Propellant Combustion Property at Low Pressure .....                                            |                                                                               |
| .....                                                                                                                               | ZHANG Wei, ZHU Hui, FANG Ding-you, XIA Zhi-xun, XUE Jin-gen ( 118 )           |
| Salts of Perchlorylamide as a Novel Class of Light-sensitive Explosive for Laser Initiation .....                                   |                                                                               |
| .....                                                                                                                               | Ilyushin M A, Tselinskii I V, Petrova N A, Chernai A V, Zemlyakov N D ( 122 ) |
| An Experimental Study on the Activity of Aluminum Powder in Some Liquid Fuels .....                                                 |                                                                               |
| .....                                                                                                                               | LIU Ji-ping, CHANG Fei, GUI Da-yong ( 124 )                                   |
| Electric Spark Sensitivity of Polynitro Compounds; Part II. A Correlation with Detonation Velocities of some Polynitro Arenes ..... |                                                                               |
| .....                                                                                                                               | VladimÓr ZEMAN, JirÓ KOČÍ, Svatopluk ZEMAN ( 127 )                            |
| A Study on Initiation Mechanism of Al-containing Explosive .....                                                                    |                                                                               |
| .....                                                                                                                               | XIA Xian-gui, BAI Jing-song, LIN Qi-wen, ZHANG Guan-ren ( 133 )               |
| A Study on the Burning Rate Characteristics of GAP/AN Propellants .....                                                             |                                                                               |
| .....                                                                                                                               | ZHAO Xiao-bin, HOU Lin-fa, ZHANG Xiao-ping, YU Min ( 137 )                    |
| Improvement and Application of an Elastomer Cross-link Density Measuring Apparatus .....                                            |                                                                               |
| .....                                                                                                                               | LU Ming, SONG Yong-lai, YUAN Qi-feng, LIU Hong, HUANG Zhi-ping ( 141 )        |
